

ThruWall Depositories

Product: KwikDrop Single ThruWall

Catalog#: 10-8951

Specifications are subject to change without notice. Please see www.kingsley.com for the most current specifications and instructions. **Made in the USA.**

ThruWall Construction/Features

Materials:	Exterior facing heavy-duty stainless-steel faceplate with aluminum grade aluminum for the interior chute and housing.
Weather Resistance:	Angled built-in weather hood shields from rain and snow. The depository door will not blow open in most winds. Caulking on the inside edges of the faceplate and weather stripping around door create increased protection from inclement weather.
Air Draft Prevention:	The AirBloc system helps to eliminate drafts caused when the depository door is opened.
Locking Method:	Easy to operate KwikLock System allows locking and unlocking of the depository door with a simple push or pull knob.
Theft Deterrence:	The upward angle of the external shroud, length of the internal slide chute, and the AirBloc system prevent reaching inside through the depository door and block theft of materials with a claw apparatus. The angle of the external shroud also acts as a deterrent to pouring liquids into the unit.
ADA Compliancy:	ADA compliant when properly installed.
Compatibility:	Compatible with and Kingsley high capacity receiving cart.
Available Wording:	Self-adhesive vinyl decal. See website for complete list of available wording options
